

Kenmore Elite Dual Oven Range PRODUCT FACTS

The Kenmore Elite Dual Oven Ranges offer an outstanding solution for customers in their every day lives. Research has shown that consumers like the ability to cook dishes simultaneously. With a single cavity oven, both dishes would have to be cooked at the same temperature causing uneven results. The Kenmore Elite Dual Oven Range solves this dilemma, allowing consumers to cook multiple dishes at various temperatures at the same time.

Available Models/Dimensions:

30" Electric Dual Oven Range (98022/3/9)

30" Electric Dual Oven Range (98002/3/9)

30" Gas Dual Oven Range (78002/3/9)

Design Highlights:

- New Kenmore Elite Visual Elements
- Full Width Glass Touch Controls
- Newly designed Metal Handle
- Blue LED Displays
- Picture Window Door Design

Features:

- **5 Element cooking surface**
9"/12" Dual Element, 9" Turbo Boil Element, 2-6" Elements and a warming zone
- **Turbo Boil Element**
Our most power full radiant element delivering 3200 watts of power but also the ability to turn off one of the ribbon elements allowing for incredible range of power
- **Precision Set (ESEC) Controls**
These controls allow the consumer to increase power to the elements in small increments for incredible control. The digital readout allows for the ability to repeat cooking results
- **Hidden Bake Self-Clean Ovens (Both)**
Industry exclusive upper oven with hidden bake element. Allows for easier clean up and a cleaner look.
- **True Convection Oven (Lower Oven)**
The addition of a fan and hidden third heating element allows convection to deliver better browning throughout the oven. It allows for multi rack baking saving time. It also roasts food faster with better results than a standard oven.
- **Chrome Ladder Racking (Upper Oven)**
The Ladder racking allows for multiple rack positions in the upper cavity but come out easily for self cleaning.
