

Kenmore Elite Induction Range PRODUCT FACTS

The exclusive Kenmore Elite Induction Ranges are the industry's first option for those customers who want all of the benefits of induction without the expense of remodeling their kitchen. Induction, continues to gain traction in the market place with new brands (GE Profile, Electrolux, Bosch, Kitchen Aid, Kenmore Pro and more) bringing induction cooktops to the market in the last two years. However, estimates show 75% of U.S. households have Free Standing ranges. Previously this great new technology was not available to these consumers.

What is Induction?

Induction cooking works by producing a magnetic field which heats the pan directly instead of the cooktop. It instantly begins to heat the pan delivering incredibly fast results, and at the same time incredible control. Additionally because induction heats the pan and not the glass, the problem of baked on spills and splatters is eliminated.

Free Standing Range #99913

The Kenmore Elite Free Standing Induction ranges feature a full induction cook top with 4 induction burners and electronic controls for precise temperature control. The product features a 10", 8", 7" and 6" induction elements for flexibility to fit any pan. The burners are controlled with our Precision Set Controls. These controls allow the customer to increase the power in small increments and monitor the power with digital readouts allowing you to repeat settings easily.

Available Models/Dimensions:

30" Free Standing Induction Range (99913)

Design Highlights:

- New Kenmore Elite Visual Elements
- Full Width Glass Touch Controls
- Newly designed Metal Handle
- Blue LED Displays
- Picture Window Door Design

Features:

- **4 Induction Elements**
10", 8", 7", and 6" for flexibility
- **Precision Set (ESEC) Controls**
These controls allow the consumer to increase power to the elements in small increments for incredible control. The digital readout allows for repeatability
- **True Convection Oven**
The addition of a fan and hidden third heating element allows convection to deliver better browning throughout the oven. It allows for multi rack baking saving time. It also roasts food faster with better results than a standard oven
- **5.8 cu ft Hidden Bake Oven**
The huge cavity allows consumers to cook 4 12 lbs turkeys and 3 pies at one time. The hidden bake element allows for easy clean up and a great appearance
- **Exclusive AirGuard technology**
This exclusive feature traps and virtually eliminates oven odors. The feature is controllable allowing the great aroma of cookies and turkey to fill the home but can be turned on to eliminate strong odors for a better experience. The feature automatically engages during self clean to eliminate the odors associated with the cleaning cycle.
- **Warming Drawer**
Keeps multiple dishes warm while preparing large meals or until the rest of the family gets home.
- **Humidity control**
Makes it easy to maximize food's potential by keeping it as moist, crunchy or crispy as it needs to be
- **MSRP: \$899.99**
