

**Kenmore Rear Control High Efficiency Washer and Rear Control Dryer  
(#48842; 8/98852) \$799.00 Washer/\$799.99 Dryer**

Introducing a fresh new addition to the Kenmore High Efficiency Laundry line up! The latest Kenmore® High Efficiency Washer and Rear Control Dryer teams up classic rear control styling with all the modern benefits of a front-load washer. Customers get outstanding cleaning performance, gentle clothes care and high-efficiency in a stylish, innovative design that is familiar and easy to use!

It's the best of both worlds...High Efficiency Performance & Classic Styling!

**Kenmore High Efficiency Rear Control Washer and Dryer #48842**

The Kenmore High Efficiency Rear Control Washer provides customers with impressive cleaning performance, energy savings, and convenience features to save time and money!

**Green Features** – The Kenmore High Efficiency Rear Control Washer and Dryer #48842 uses 76% less water and 61% less energy\* saving customers money on utility bills and helps them do their part in conserving our natural resources.

\* Source: U.S. Department of Energy (DOE): Compared to a conventional washer manufactured before 2004, using the Normal cycle.

**Load Sensor** –Kenmore Advantage: How about saving money on detergent? The Load Sensor optimizes the performance of the wash and rinse cycles and automatically displays on the control panel how much detergent is required so customers use only as much as they truly need to get clothes clean...so you don't use too much detergent...which equals money in your pocket!

**Clean Washer** –Kenmore Advantage (at this price point): You can clean the wash tub too! The Clean Washer cycle effectively cleans the wash tub and helps eliminate the source of odors so customers can enjoy clean, fresh clothes.

**Easy Spin** –Kenmore Advantage: Enjoy quieter operation and less vibration! In some installations, even the best washers can create some noise and vibration. The Easy Spin option helps by carefully controlling the spin speed of the washer and load balance so customers with affected installations can enjoy quieter operation and less vibration.

**Lost and Found** - Ever wonder where small items such as pocket change or a hair clip go when washing clothes? This Kenmore washer features a special filter that is designed to protect the pump should a small item happen to find its way past the washer gasket. Behind the access door on the bottom left hand corner of the washer is a small hose and a filter basket that allows you to drain the water from the pump and retrieve lost items before they potentially cause damage to the filter. What was once lost, can now be found!

### **Kenmore Rear Control Dryer #8/98852**

The new Kenmore Rear Control Dryer is stylish, performance and feature packed...plus it integrates perfectly with other Kenmore appliances.

**Check Vent Sensor** – You'll enjoy peace of mind and improved drying performance! With the Check Vent sensor a single flashing light on the control panel will alert you to a clogged vent duct so you can clean the duct, and improve operating efficiency...helping you avoid unnecessary service calls and save you time in the laundry room.

**Stainless Steel Drum - Performance**...strength and durability! Our durable stainless steel drum eliminates rusting and chipping for long lasting performance!

**My Cycle - Customization** right at your fingertips! The My Cycle option recalls your favorite cycle for set-it-and-go convenience. Set it and every time you do a load your favorite settings are stored...saving you time!
